Featured Product: Media CTS

Media CTS is a Web Based scalable application that can be tailored for both small and large broadcasters and is suitable for all types of operations including terrestrial along with multi-channel cable and satellite. The product contains all of the features needed to manage a traffic scheduling and advertising sales operation. The application is modular and it is possible to purchase only those modules that are required.

The system can be tailored to operate in a range of different environments with support for multi-channel operation and multi-currency transactions.

User maintained libraries of commercials and promotions are used to create frame accurate transmission schedules. Our comprehensive asset management routines include program amortisation updated automatically from as-run logs. Media files are linked to playback equipment to control the media ingest process.
